

Intermediate with Arts course details

Introduction:-

- In the Intermediate of Arts course, you are given basic knowledge of the art subject. There are many subjects inside it, from which you can choose your topic according to your interests.
- After doing intermediate arts, you become eligible for many jobs and Higher education courses.
- So you can say that this course is the starting course of your career in the field of arts.
- Students, whose interests fall under arts and literature such as language subjects are in Hindi, English, History, Psychology, Philosophy, Political Science, Home Science, etc, should join this course.
- After this course, you can choose your favorite subject from the option of many available subjects, and take your career to a good height.
- You can guess the potential of the art course from the fact that many of the students who become IAS and IPS after qualifying UPSC are from the arts background.

Eligibility for IA course:-

- Eligibility Criteria are very easy for Intermediate of Arts.
- In many colleges and schools, you can get admission based on your 10th mark directly.
- Your 10th or Matriculation should be from any recognized board, State Board, or CBSE Board.
- It means you can get admission in most of the colleges with your 10th mark; the minimum percentage should be 33%.
- But many colleges demand a high percentage on the 10th for admission in this course. For example, some such colleges are DU colleges.

Admission Procedure for Intermediate of Arts:-

- Most of the colleges provide you admission in the IA course based on your 10th mark.
- But some top colleges can even conduct a personal interview before admission.
- Tuition Fees for Intermediate of Arts course
- The state government, central government or some Trusts owns most of the colleges and schools for this course, so the tuition fees are negligible.
- In most of the states, the state board or colleges only charge exam fees to their students.
- But in Private colleges or schools, students have to pay tuition fees also, which is ranging from 1000 per month to even 5000 per month in some cases.

Subjects options under Intermediate of Arts:-

Many subject options are available, one can choose from the following-

1. History

2. Many high potential higher education options are available after this course.
3. Many Job options are also available after this course.

Details subject information:-

Arts Stream Subjects Explained:-

1. History:-

- One of the traditional Arts stream subjects, History teaches the evolution of human civilization from prehistory to the present times.
- It also covers the major historical events, lays emphasis on the art and architecture such as the history of Indian Art, and imparts knowledge on the works of great personalities of the world.
- The curriculum of the subject takes you on a journey of mankind and develops your insight into the future of development.
- On pursuing courses like BA History, MA History, etc. you will gain knowledge pertaining to Ancient History, Medieval History, Modern History, Political History, Cultures of the World, Language and Literature, amongst others. Graduates in History can enter into professions like Teaching, Research, Conservation Management, Archaeology, Civil Services, Public Administration, Travel and Tourism and Media Studies.
- Also, you will easily find History in the syllabus of BA courses after 12th Arts.

2. Economics:-

- Economics studies the processes or systems by which goods and services are produced, sold and bought at a larger level (Macroeconomics) and at the smaller individual level (Microeconomics).
- The subject deals with the behavior and interactions of economic agents and how various economies work.

- From Business and Managerial Economics to Financial and Agricultural Economics, there are scores of domains you can specialize in.
- Further, after pursuing courses like BSc Economics, BA Economics, etc. you can work in sectors like Banking, Insurance, Real Estate, Service and Manufacturing Firms, Consulting, Non-profit Organizations, and Government Agencies and build a successful career in Economics!

3. Geography:-

- Concerned with studying the relationships between people and their environment, physical properties of the Earth's, people and economy, etc. Geography is one of the most-sought after Arts stream subjects.
- The Geography syllabus builds a strong foundation in concepts related to landforms, flora & fauna, world, population, economy, transportation, etc.
- Other than this, those interested in developing different types of maps and travel guides can opt for programs in the specialized field of Cartography.
- Those striving for a career in Geography can choose from a range of job opportunities such as GIS specialist, Environmental Consultant, Teacher, Town Planner, Conservation and Recycling Officer, etc.

4. Political Science:-

- Political Science is one of the fundamental Arts stream subjects which deal with the state and systems of government and scientific analysis of various political activities and their behavior.
- Administrative theories and concepts of the domain cover numerous subfields including Political Economy, International Relations, Comparative Politics, Public Policy, and Political Methodology.
- BA Political Science followed by an MA in Political Science can help you build a strong career in this specialized field of Social Science.
- Further, the Political Science syllabus helps individuals discover a wide spectrum of a potential career in Political Science such as political office holders, law firms, law enforcement agencies, political organization, field research firms and many more.

5. English:-

- English, which is one of the compulsory Arts stream subjects, offers a well-structured syllabus covering various facets of the subject.
- Apart from laying emphasis on improving the writing and speaking skills, the curriculum also focuses on reading skills through English literature.
- The class 11th and 12th level English builds a strong foundation for English Literature courses, exams like IELTS, TOEFL, English Olympiad exam, etc.

6. Psychology:-

- Psychology is the multidisciplinary scientific study of mind and behavior which includes human development, sports, clinical, health, social behavior, and cognitive processes.

- This is one of the most interesting class 12 Arts subjects involving research of conscious and unconscious phenomena, and feelings and thought.
- BSc Psychology, Clinical Psychology Courses, MSc Psychology, etc. are some of the routes that you can consider to kick start a career in Psychology.
- Further, Individuals pursuing an academic education in the field can explore varied careers as psychologists, therapists or can find employment opportunities in fields of Health Psychology, Mental Health Services, Criminal Justice, Social Work, etc.

7. Sociology:-

- If you are exploring what is the subject in BA, then, Sociology may top your list.
- Sociology is a branch of Social Science which deals with the study of the evolution of human society, social relationships, interactions and cultures around the world.
- Other than this, the Sociology syllabus involves the use of empirical investigation and critical analysis to develop an understanding of social order, acceptance, and social evolution.
- By pursuing bachelor's or masters level courses like MA Sociology, individuals become sensitive towards differences in society and develop ideas that help shape the modern world.
- Further, the subject prepares you for a wide variety of jobs in the Education sector, Journalism, Politics, Youth Services, Social Work, Labour Unions, Civil Services, Trade Associations, NGOs, etc.
- Thus, the scope of Sociology is immense!

8. Philosophy:-

- Philosophy involves the study of general and fundamental questions about existence, knowledge, reasons, values, mind, language and nature of humans and the world around.
- Students pursuing a career in Philosophy develop a base for creative thinking and logical reasoning which further helps in contributing to the general good of society.
- Being a popular subject in BA courses, Philosophy is known as a subject for thinkers.
- Individuals with an interest in this field can pursue courses like BA, MA Philosophy, MPhil and can also appear for Civil Services examinations as well.
- Graduates can pursue jobs in different fields like Social Work, Public Services, Research, Education, Media, and Law.

9. Music:-

- One of the most unique and creative fields to kick start a career in is Music! Not just limited to music composition, one can explore instrument-based programs, Music Production courses, etc.
- Further, on enrolling in courses like Diploma in Music or Bachelor of Music, you will gain knowledge on various topics like Film Scoring, Music Writing, Sound Production, etc.

- Apart from imparting knowledge on scores of topics, Music, which lately has become one of the popular Arts stream subjects, also equips the learners with communication skills and music editing abilities.

10. Human Rights and Gender Studies:-

- Human Rights and Gender Studies is an interdisciplinary subject devoted to understanding fundamental rights and gender-related issues.
- These include studies concerning women, feminism, gender, politics, men's studies and queer studies.
- You will get to study how gender shapes identity and facilitates social interactions.
- Human Rights courses deal with the essential rights for human development.
- Gender equality has always been a generally accepted refrain and there are varied international approaches that have emerged towards the development of human rights.

11. Informatics Practices:-

- Informatics Practices allow students to learn the basics of computer hardware and software.
- Various topics covered under this subject as per the Informatics Practices class 12 syllabus include operating systems, database management systems, introduction to programming, programming languages like Oracle, Java, SQL, etc. The course aims to help individuals design, program and develop databases driven web apps using GUI Programming.
- Graduate in this popular Arts stream subject can work in a wide range of profiles like Analyst Programmer, Computer Games Developer, Information Architect, Business Analyst, amongst others.

12. Public Administration:-

- Public Administration works on the formulation, implementation, and monitoring of various public policies across industries.
- The individuals aspiring to build a career in Civil Services through UPSC exams can consider enrolling in a related degree program.
- You can also pursue courses like Masters in Public Administration [MPA] and work as a consultant, teacher, Employee Relations Specialist, Fundraising Manager, etc.
- Since the field demands highly ethical professionals who can work towards the greater welfare of the community, it is also important to work on your communication and presentation abilities apart from other career skills.

13. Home Science:-

- Home Science is scientific knowledge of nutrition, health and growth measures. Graduates in Home Science can pursue a career in various specializations such as in Clothing and Textile, Foods and Nutrition, Home Management, Family Relations, Child Development, and Extension Education.
- There are ample job opportunities for Home Science enthusiasts in commercial restaurants, apparel merchandising, fashion journalism, fashion designing, cafeterias, hospitals, welfare organizations, and community development programs.

14. Legal Studies:-

- A career in Legal Studies gives an insight into the nature of political institutions, sources of law, evolution of legal system, social actors involved in the legal process, civil and criminal courts and processes, family justice system, individual liberty and privacy and social equality.
- It is an interdisciplinary field that deals with the study of the mutual relationship between society and law.
- There are scores of areas you can specialize in like Cyber Law, Criminal Law, Labour Law, Environmental Law, Business Law, etc.
- LLB or LLM graduates can work in administrations of Business, Justice and Law and related fields like Insurance, Social Services, and Social Security.

15. Mass Media Studies:-

- Mass Media Studies is an interdisciplinary field derived from the traditional Social Sciences and Arts stream subjects.
- Laying focus on the effects of various media, its history, and content, it offers an array of career opportunities after 12th.
- Bachelor of Journalism, Content Writing Courses, Video Production, New Media, Mass Communication Course, Film Studies, etc. is some of the programs through which you can build a career in this field.
- Areas of work in Media Studies include Television, Newspaper, Radio, Cinema, Video, Digital Media, Journalism, Writing and Publishing.

16. Entrepreneurship:-

- Entrepreneurship is a subject that resembles Business Studies but offers basic insights and understanding into the principles of developing, organizing and managing a business venture.
- Apart from equipping with the skills of handling the risks associated with the start-ups, Entrepreneurship Development Programs also enhance the other career skills.
- On pursuing courses like Corporate Entrepreneurship, MBA in Entrepreneurship, etc, you can find jobs in an array of industries as consultants, sales managers, etc or can work as small business owners, new venture developers, etc.

17. Physical Education:-

- Studying Health and Physical Education, students get to learn about the world of physical wellness and sports.
- Concepts pertaining to Sports (such as soccer, basketball, cricket, volleyball, track & field, swimming, etc), Yoga, Psychology, measurements, Anatomy and Physiology are taught in the syllabus of Physical Education Class 12 as well as in 11th.
- Further, training, doping, physical activity, positive social skills, and leadership training are also covered.

- The overall curriculum of various undergraduate and postgraduate courses like Bachelor of Physical Education includes engaging lessons, training PE teachers/faculties, adequate instructional periods and student evaluation.
- Career options for graduates in Physical Education are teaching PE, activities director, athletic coach and fitness instructor or personal trainer.

18. Fashion Studies:-

- Fashion Studies helps you develop a critical and historical understanding of Fashion and its complex intersections with identities and cultures.
- Students investigate the material and visual dimensions of Fashion as image, dress, and bodily practice and as a major cultural identity within society and the world.
- Moreover, the study areas comprise the factors influencing fashion, its key concepts, and terminologies.
- Be it starting a career in Fashion Designing or pursuing other related fields, there are ample opportunities for graduates in Fashion Studies like Fashion Designer, Retail Buyer and Manager, Stylist, Textile Designer, Jewellery Designer, Make-up Artists, Fashion Bloggers, etc.

19. Fine Arts:-

- Fine Arts is one of the most suitable Arts stream subjects for those who want to build a career in Painting, Sculpture, Graphics, Applied Art, Commercial Art, amongst others.
- Apart from inculcating creative thinking, the students are taught about artistic marvels and their history coupled with specific practical training in their chosen specialization.
- On pursuing Fine Arts Courses like Bachelor of Fine Arts, Master of Fine Arts, etc, you can work in a wide range of job profiles in Art Therapy, Multimedia Programming, Set Designing, Film Direction, etc.

Additional Subjects:-

- In addition to these, there is a few other optional Arts stream subjects offered in schools including Folk Music, Carnatic Music, Western Music, Dance, Creative Writing, Foreign Languages such as German, French, Mandarin, Japanese, Spanish, etc.

Why study Arts Stream Subjects?

- Humanities stream, which is popularly known as “Arts” provide a platform for student to study human society and the world.
- It is an extensively vast stream, offering numerous career options to students. Right from studying how people interact in group settings to understand the legal rights of the citizen, everything comes under the purview of Art stream subjects.
- Unlike Science and Commerce, Arts has a range of subjects for students to choose from.
- In fact, if your institution provides you with a good number of electives, then you might have the chance to design the entire curriculum through the right subject combination!

Education Boards Offering Arts Stream Subjects:-

- When we talk about the current education system in India then apart from the state boards, the students can study Arts stream subjects from 3 major national-level education boards namely, Central Board of Secondary Education (CBSE), Indian Certificate of Secondary Education (ICSE), and International Baccalaureate (IB).
- Students are allowed to choose a board that best suits them and the choice is made on the basis of the difficulty level associated with each board, besides the aptitude of the students.
- IB is the toughest board as it lays emphasis on the practical aspects of learning, followed by the ICSE board.
- CBSE board is quite popular and falls under the Union Government of India, and the difficulty level is quite moderate.
- Every state in the country has its own education board and MOI in case of institutions affiliated to such boards are English and Regional Languages.

List of Popular Government Jobs after 12th Arts Stream:-

- There are various public sector positions that a candidate can apply for immediately after class 12th.
- The basic eligibility to apply for these government jobs are 12th marks and entrance exams.
